

## Tasks to solve in this exercise

### Stacked bar chart

1. Open the attached Power BI .pbix file or use your own solution from the last exercise
2. Create a stacked bar chart and visualize the >City< in the axis and >Profit< as the Values.
3. Turn of the title in the X axis (>City< should not be visible).
4. Change the title to "Our profit" and change the alignment of the title to center.
5. Change the color of your visual.
6. Modify the filtering of the visual so that only the top 10 cities by profit are visible.

### Pie Chart

7. Create a pie chart visualizing the Profit by Sub-Category.
8. Turn of the legend.
9. Display for the data labels the category and the percentage.
10. Align the title in the center and change it if you want.

### Slicer

11. Create a slicer with the Order Date.
12. Align everything so that you are happy with it.
